

Compensator

LCRSS

Description

Used to balance the elongation of a rectangular smoke control duct when it gets warm and to prevent longitudinal forces resulting from this.

When the compensator is installed it should be fully elongated. When fully elongated l_{max} is 240 mm and flexible part is 100 mm.

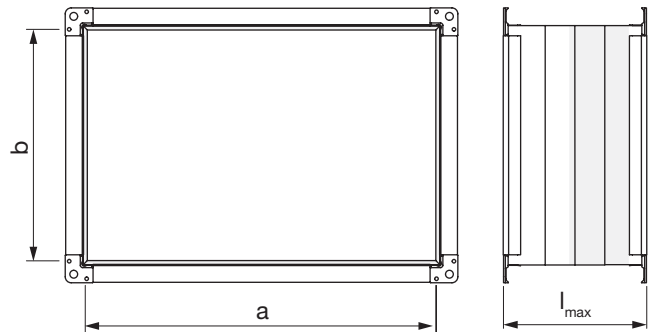

The product is CE marked according to EN 12101-7 and used in a rectangular smoke control system - single compartment (see declaration of performance).
