

Blade dampers

DGS

Description

The opposed blade damper DGS and DGSS can be fitted to SD steel grilles and SSD stainless steel grilles. The DGSS has a frame of stainless steel and is mainly to be used with the SSD grilles, see material and finish for details. The DGS and DGSS have mechanisms for opening and closing all the damper blades simultaneously, by using a screwdriver and are held in place by clips, designed for easy fitting of the damper to the grille.

Maintenance

The grille should be removed to gain access to the opposed blade damper or duct. The external parts should be wiped with a damp cloth.

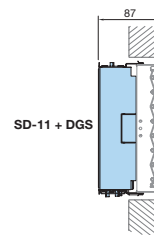

Order code

Product	aaa	bbb x ccc
Type		
DGS (For SD and SSD grilles, except SSD-13)		
DGSS (For SSD grilles, except SSD-13)		
Size		
DGS, DGSS		
L: min. 225 - max. 1225 mm		
H: min. 75 - max. 525 mm		
For details, see min. - max. dimension table		

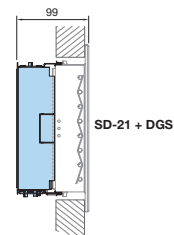

Example: DGS - 725 - 225

Min. - max. dimensions

125					
225					
325					
425					
525					

Grille with 1 row of blades.

Grille with 2 rows of blades.

The DGS / DGSS are full length opposed blade dampers available for all SD and SSD grilles. (Except SSD-13 which can't have a damper). The only difference between DGS and DGSS is materials.

Materials and finish

DGS: Casing in galvanized steel blades in plastic.
 DGSS: Casing in stainless steel blades in aluminium.
